indorse

Indorse is a vendor for a multi-solution product based in Saudi Arabia. Indorse allows enterprises and organizations to automate document approval process, manage their digital signatures and collaborate across departments. Indorse enable organization to create optimized, fast and secure processes that scale to cater the business needs and achieve the planned goals.

We're leveraging digital transformation maturity in an ultra-connected world through pioneering technology that creates a seamless user experience, accelerates products' time to market, and reduces risk with fewer errors and more automation so our customers can spare more time on what matters to their core business and increase employees productivity.

VISION

We want to be the foremost document automation with governance solutions provider as a local software vendor in the KSA by 2025.

We are doing that to enable corporate governance in critical areas of their business processes to help them boost growth and long-term financial viability. We believe improving business processes and fostering digital transformation are crucial for our customers to run smoothly and viably.

Thus, we look forward to being recognized as the most trusted, manifold, and speedy service provider who's the picked partner delivering signature and process automation solutions for medium to large organizations.

Our next step is to move toward our business operations expansion in GCC and different regions in the Arab World ahead.

MISSION

To help organizations in diverse sectors join the digital transformation with governance path and enable them to unlock the potential of automation opportunities – spare more time on what matters and spend less money on what doesn't, while being more compliant, using resources wisely, fulfilling their customers' needs efficiently, driving their business value, and keeping them running without the hassle of paperwork.

INDORSE OFFERING

Indorse is an easy-to-use platform for digital signing, processing, archiving, and managing digital documents. Its core consists of a digital signature transactions solution, content and archiving solution, and workflow process management solution. In addition to office suite solution for editing text, presentation and spreadsheet files. Indorse is an Enterprise Level System that includes four solutions in single product price with unlimited signatures .Hyland-Alfresco content engine is embedded in Indorse products.

DIGITAL SIGNATURE TRANSACTIONS

**Agile, Accurate
& an Active E-Signature Solution.
Support all your Business Needs.**

Indorse provide many types of digital signature depending on the reason, on behalf of an organization, an employee or a natural person.

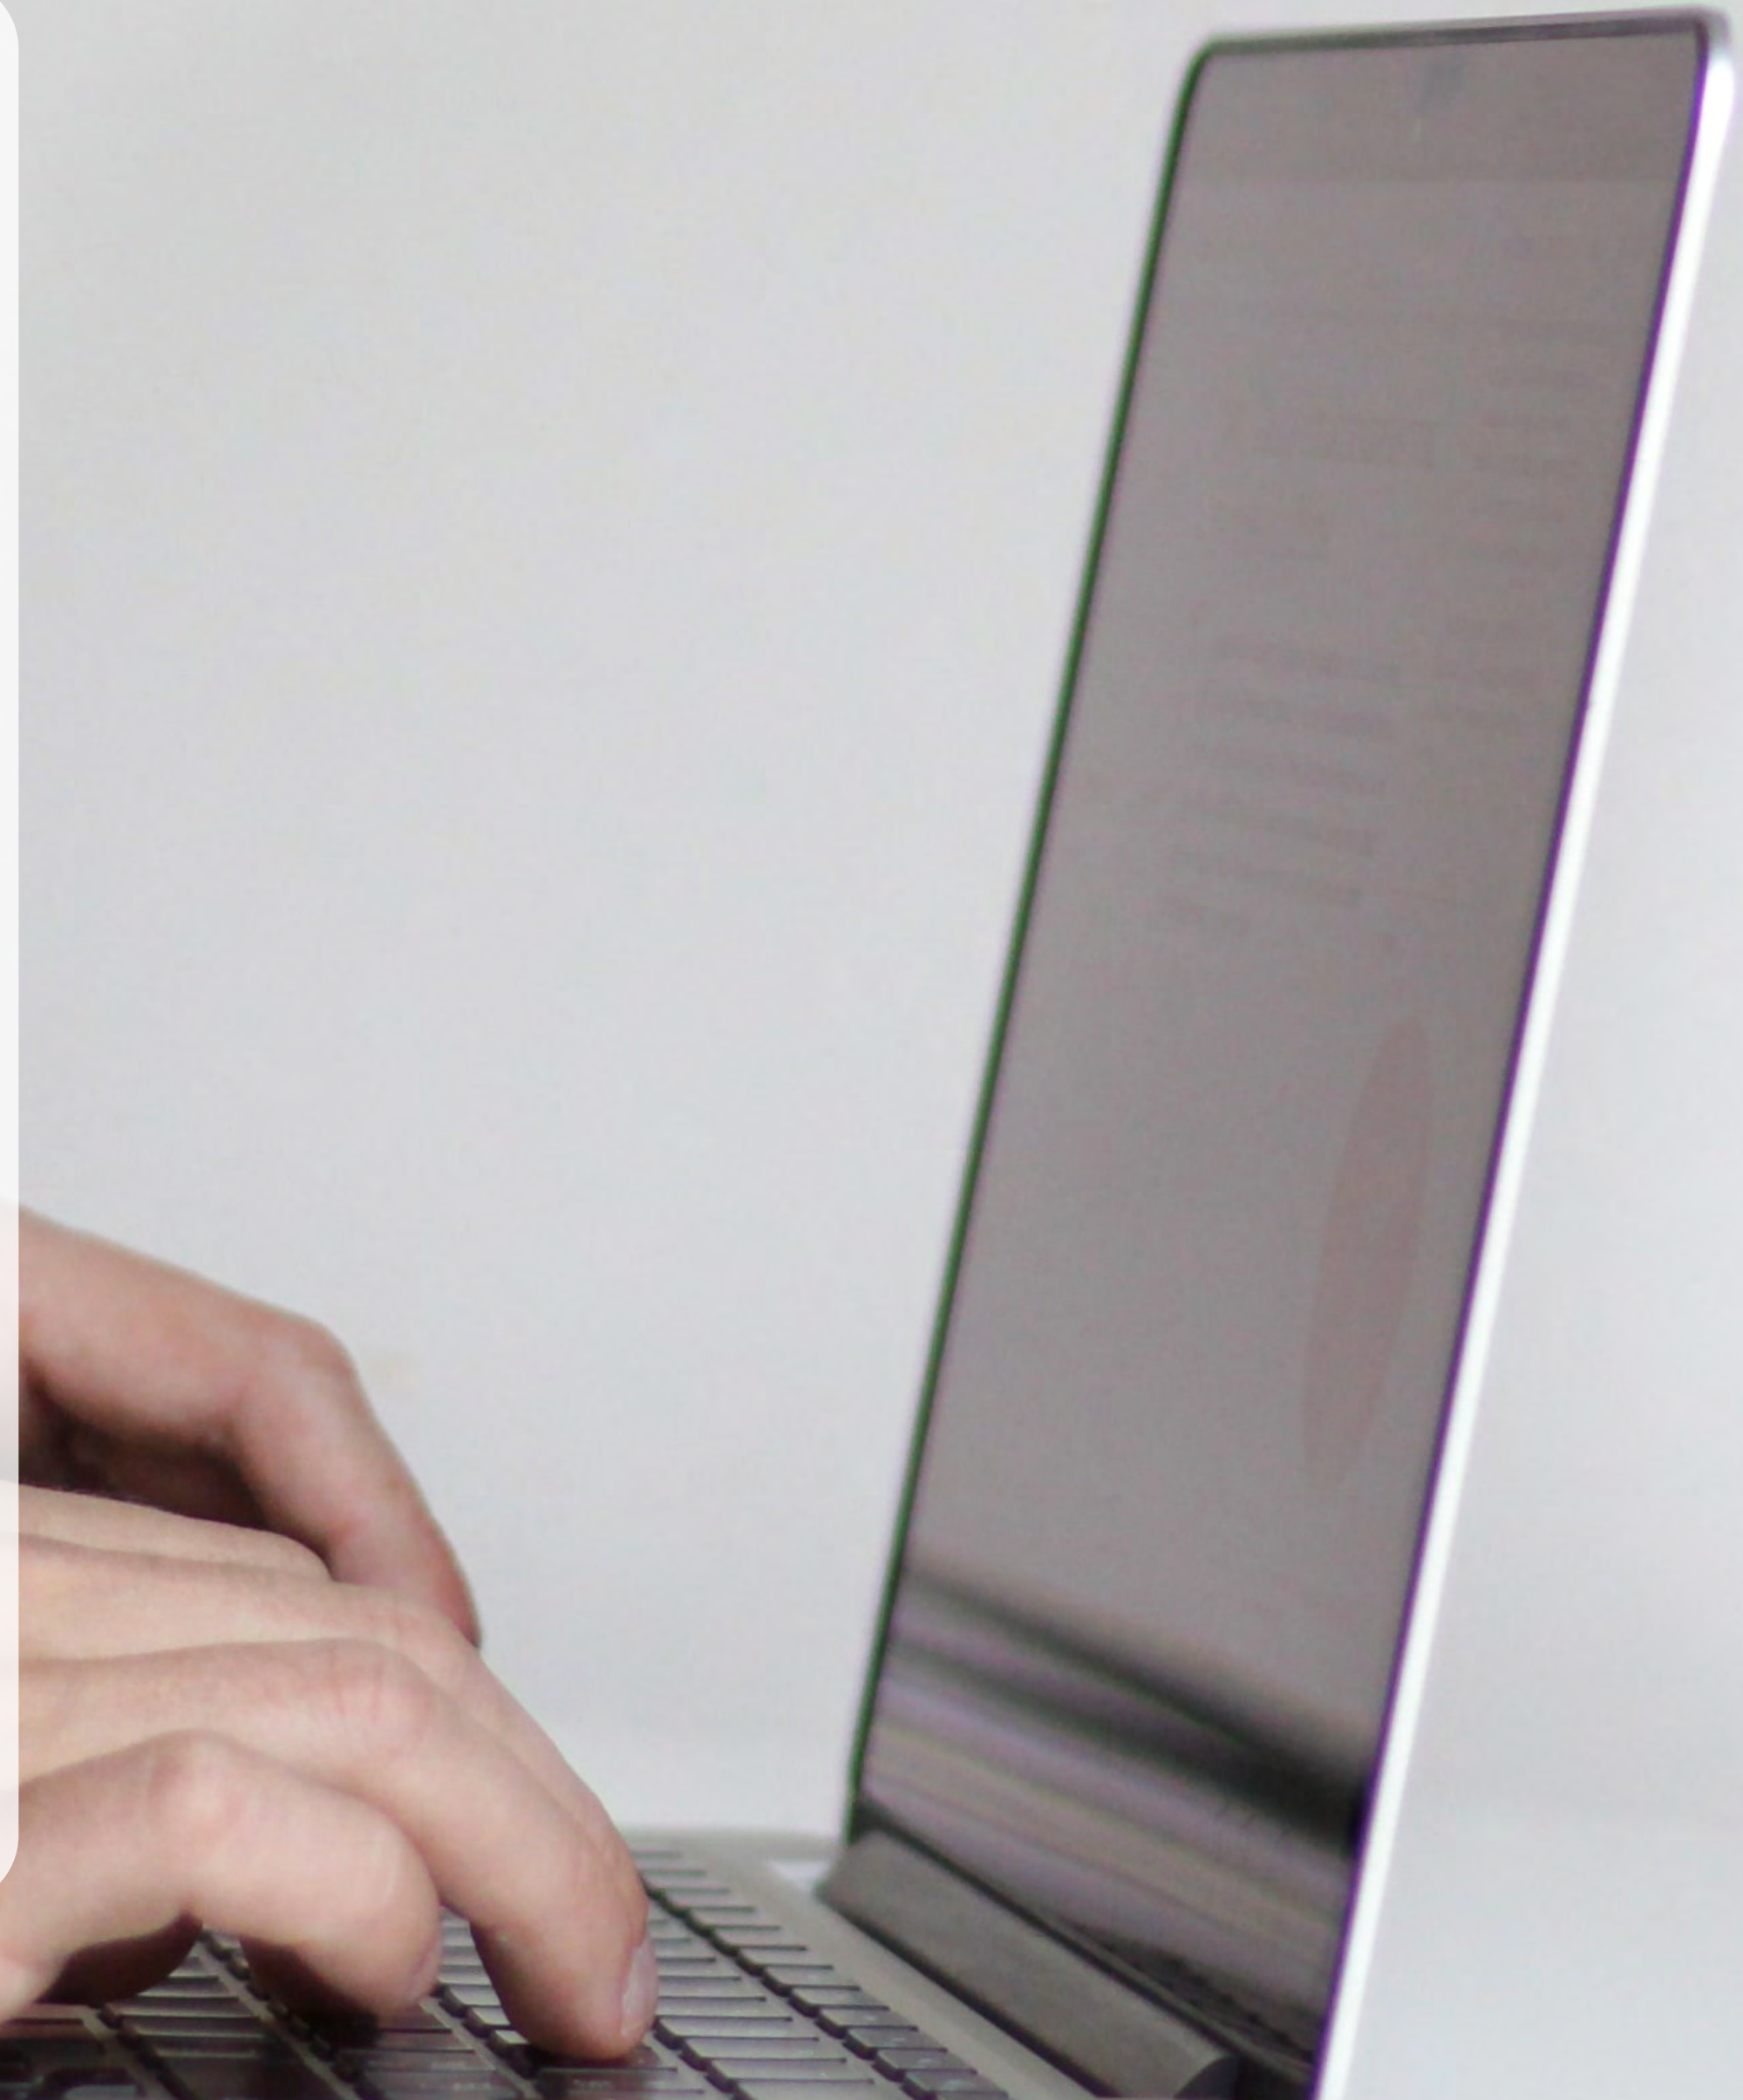

Sign is to approve the content of a document on behalf of an employee or by a natural person.

Endorse is to approve the content of document on behalf of an organization.

Seal is to certify the content of a document on behalf of an organization.

With Indorse digital signature, companies send documents for signing online, follow the status of their requests, and receive documents signed straight from their devices.

It's a trusted way, more secure and efficient than using pen and paper.

CONTENT AND ARCHIVING

Save your entire files in a safe, centralized digital repository.

Access your documents on the go and reduce the chance of misplacing a file.

Indorse Content Services provides open, flexible, highly scalable (ECM) capabilities with the added benefits of a content services platform making content accessible wherever and however you work through easy integrations with the business applications you use every day.

Comprehensive ECM services support your digital transformation and help your enterprise improve productivity through managing your documents, capturing, storing, activating, analyzing, and automating business content to get the value of it, collaborate closely, and make decisions effectively.

PROCESS WORKFLOWS

**Simple and Unlimited.
Get all your documents signed fast!**

Indorse support two types of workflows sequential and parallel and allow enterprise users to assign tasks to employees, customers or suppliers with predefined actions to perform on documents. Process workflows are a huge pain.

It's going slow, and the results are probably inaccurate. With Indorse, individuals are assigned with particular tasks to implement on documents in ways for seamless & successive.

OFFICE SUITE

Connect Indorse with your work!

Office Suite is excellent online office suite solution for enterprises that need a powerful office suite in the cloud, or on-premise, that protects their privacy and allows them to keep full control of their sensitive corporate data.

“Office Suite”, Allows users to access and manage your files anywhere, on the web and on the go, While keeping your files information private.

Office suite allows you to collaborate editing files in real time.
